

Sports Responder Course

We hope you enjoyed attending the Sports Responder Course. The purpose of this course is to:

- Better integrate EMS and other healthcare professions in the care provided during athletic events.
- “Fill gaps” where EMS is present, but there is no athletic trainer (AT) to elevate the care provided to the athlete.
- Raise awareness to the importance of healthcare profession integration as well as further educate EMS personnel on sports-related injuries and conditions for the overall health and wellness of the athlete.

If you believe your local departments would benefit from this course, please contact us to coordinate a course presentation.
